

Cab - 4500

Designed to fit the Ventrac 4500 tractors, the KW450 Cab offers exceptional visibility, while providing the operator with protection and comfort in many weather conditions. The optional console heater (available on liquid-cooled engines) will provide hours of warmth while the roomy interior and additional headspace also add to operator comfort.

Featuring tempered safety glass, removable doors, heavy duty front wiper, and interior lighting, the quality and performance you come to expect from Ventrac shines through. Standard with the KW450 cab are LED work lights, removable doors as well as removable side windows for year round operation and driver comfort. The side windows vent to provide air circulation as needed. Rubber cab mounts are used to reduce noise and vibration. The contour molded top allows for less collection of snow and water.

Cab shown with optional Directional/Hazards, Strobe Beacon, & Mirrors installed on a 4500Z with a SS575 Spreader.

More interior room, and exceptional visibility

Switches conveniently located in roof

All specifications subject to change without notice or obligation

Notes:

- The cab can not be used with the Ventrac KH500 loader or RV600 Vacuum Collection System attachments.
- The 30A charge system of the 4500P does not allow for continuous operation of additional electric cab accessories in conjunction with the tractor lighting system. Continuous use may result in low battery voltage and/or ultimately ruin the battery.
- Do not operate on slopes over 10° when cab is installed.
